DACTYLOSPORANGIUM THAILANDENSIS
SHOULD BE D. THAILANDENSE

J. E. Theimann

Research Laboratories, Lepetit S. p. A.

Milan, Italy

After the paper, "A new genus of the Actinoplanaceae: Dactylosporangium" was published (Arch. Mikrobiol. 58: 42-52, 1967) it was called to my attention by Dr. G. A. de Vries that the correct Latin epithet of the type species of the genus, Dactylosporangium thailandensis, should be thailandense.

It is therefore proposed to change the specific epithet to its correct form as Dactylosporangium thailandense.
